

The Truth Shall Set You Free

In today's world, it's hard to know what's true and what's not. Rule of thumb: **Be skeptical of everything.** Check it out with your personal data base (i.e, your brain, not your emotions). Be careful of believing what you **want** to believe. It's an easy trap to fall into. We have been lied to for a very long time so the traditional traffickers in information (the government, the media, professional alliances (including the revered medical associations) and corporate America (particularly pharmaceutical companies) are no longer (if ever) arbiters of truth. And our government has secretly passed laws that **allow** them to lie to us. We are on our own.

Covid was far less deadly than we were led to believe and medication that worked was disparaged as horse paste. Unnecessary loss of life, as well as psychological and economic destruction, was the result. You can decide for yourself whether it was deliberate. Alarming miscarriage rates reported by doctors and unusual, excess deaths for the years of 2021-2023 recorded by life insurance companies continue to "baffle" doctors. Lately though, new vaccinations and booster rates are way down. Do you suppose there's a connection?

Climate change and systemic racism (whatever that is) has become the "go to" cause of everything that is destroying our planet and oppressing minorities. Those cheap fossil fuels that have greatly improved people's standard of living across the world have got to go. Expensive electricity is the way to go. Merit and competence are out; equity is in. Like it or not. Opinions expressed outside the official narrative is considered hate speech, increasing the importance of finding alternative sources of news and information.

We fight our wars through proxies, providing money and equipment that send the children of those nations to fight our battles while our military industrial complex and the politicians who vote to fund these wars make record profits. The kickbacks from our Ukraine funding to high level U.S. politicians are in the millions. Money laundering is an art form that ensures steady support for a war we have no business being in.

In the meantime, our country suffers from massive illegal immigration that fuels the fentanyl killing our citizens (especially our young) and the abuse and human trafficking of migrant women and children. Our open borders facilitate the free flow of criminals and rogue state actors into the U.S. Too many of our politicians rush to defend foreign borders, yet fail in their duty to hold the administration accountable for this breach of responsibility. Remember their names on election day and vote accordingly.

Our children are being indoctrinated and sexualized in public schools and our food supply poisoned with chemicals banned in other countries. Across America and Europe, chemtrails pollute our skies and our air.

None of this is new, but by discovering the truth for yourself, you become part of a global movement to restore sanity to our world. A Great Awakening is happening.

<--Found on Telegram. McVeigh was supposedly executed by the federal government. The Final Jihad is "faction" about the Okla bombing written by Martin Keating in case you're curious.

Seek Truth and pursue it steadily

—George Washington

Avoid the legacy media. You'll hear what they're saying regardless and they're all saying the same thing. (Research Operation Mockingbird). Find some organizations that support your values and sign up for their newsletters. Hint: Don't use Google to search for them. Try Yandex for a search engine that won't track you. Sign up for Telegram. There are some good channels to check out listed below. You can start there and find other channels that interest you. Support them if you can. Keep the truth or at least an alternative version of the official narrative alive.

Subscribe to a traditional newspaper like The Epoch Times or a news magazine like the Washington Stand to read real news without the spin. The NY Times and the Washington (Com)Post are government mouthpieces and have been caught more than once printing false information. If you read the Wall Street Journal or watch Fox News, use caution. X formerly known as Twitter appears to be holding the censorship found on most social media apps at bay. But nothing is perfect. Tucker Carlson is doing some interesting interviews.

Read some well researched books, such as *Lost in Trans Nation* by Miriam Grossman, *The Psychology of Tyranny* by Desmet Mathias, anything by Elana Freeland who exposes the the truth about chemtrails, HAARP and the weaponized environment, *The Moral Case for Fossil Fuels* by Alex Epstein or *The Invisible Rainbow* by Arthur Firstenberg. Patrick Wood, who warned us about technocracy has a new book, *The Twin Evils of Technocracy and Transhumanism* that continues to expose the dangers of technology.
